

Even dogs understand passive solar heat...

Pilkington **Energy Advantage**TM Low-E

More and more people are starting to understand passive solar heat, which is why Pilkington has the best Low-E product on the market. Created using a patented color suppression process, **Pilkington Energy Advantage**TM Low-E is consistently color neutral and offers true high performance with emissivity 55 percent lower than first generation pyrolytics. By allowing much of the direct solar heat gain through the window, **Energy Advantage**TM is often referred to as a “passive solar” glass product. This is the glass of choice for residential applications in heating dominated areas. For more information please call 800 221 0444 or visit our website www.pilkington.com/na
