

FOR THOSE OF YOU KEEPING SCORE

VersaCore+Green™ puts up some serious numbers.

Some people are really into numbers. Here's a few to chew on: 58% recycled content,* 20 possible LEED points and R-Values as high as R-21. We can go on if you like. How about 12 days? That represents the time it takes for us to enclose a 100,000 square foot building. And what about dollars? Well, if that's your idea of green, you're really going to love Fabcon precast wall systems. **To request additional information, including our Engineering Details CD, Finish Guide or Product Catalog, visit www.Fabcon-USA.com or call 877-4-FABCON.**

BETTER, STRONGER, FASTER
...and Greener!

*VersaCore+Green contains up to 58% post-consumer and post-industrial recycled content by materials value. Most buildings are enclosed within 30 days from first panel delivery. All R-values vary depending on panel specifications and client requirements.
