HIGH-PERFORMANCE LAUNDRY EQUIPMENT

\$\$ | G

Continental Girbau, Inc.

▲ Continental's high-performance washer-extractors make installation easy and give you the freedom to design the laundry room where you want it, not where install requirements dictate. And, with over 75 years of successful performance, quality, and durability, you can rest assured that Continental laundry equipment will withstand the rigors and demands your clients require.

Performance Data:

- Stainless steel and Titan steel construction
- Do not require reinforced concrete foundations

EQUIPMENT

ENERGY-RECOVERY COOLING SOLUTION

United Metal Products

▲ The ERU™ is an efficient energy-recovery cooling solution. The ERU™ is a cost-effective system that is perfect for facilities seeking LEED certification. This compressor- and refrigerant-free cooling solution is perfect for industrial applications in areas with low wet bulb temperatures. For more information call United Metal Products or visit their web site.

EQUIPMENT

INDIRECT-DIRECT COOLING SOLUTION

United Metal Products

▲ The IDU™ is an energy-efficient indirect-direct cooling solution. This compressor-free system is perfect for data centers and commercial/industrial facilities seeking LEED certification. The IDU™ is more effective than evaporative cooling in that it can lower the supply air temperature by as much as 10°F. For more information call United Metal Products or visit their web site.

POROUS HARD-SURFACED PAVEMENTS

\$\$ | G | NEW

Presto Products Company – Geosystems

▲ FilterPave™ bonded glass pavement offers architectural aesthetics and permeability.

Product Application:

- Permeable parking areas
- Trails, walkways, and sidewalks
- Driveways and pedestrian patios

Performance Data:

- Utilizes 100% post-consumer recycled glass, LEED green building credits
- High-porosity system, filters stormwater, and reduces runoff

MATERIALS

ARCHITECTURAL WOOD POLES

\$\$ | G | NEW

Architectural Wood Products

▲ Enhance your landscape with the natural elegance of Cavawood wood poles. Wood is a renewable resource and an energy-wise alternative to metal poles. Cavawood poles are made with Alaskan Yellow Cedar wood which is naturally resistant to decay and insects without the use of any chemical preservatives. The poles are tapered, laminated beams for exceptional strength. The aluminum base incorporates an anchor base and wiring compartment for a trouble-free installation. Cavawood wood poles are comparably priced with aluminum poles.
