

ZURN ONE-PINT-FLUSH URINALS

Zurn's one-pint ultra-high-efficiency urinals—they have seven models to choose from—are an easy retrofit to save water, satisfy code organizations that are reluctant about waterless units (cleaning crews will like the reduced maintenance as well), and appeal to traditional urinal users. An internal flow regulator guarantees consistent water savings, and the hands-free smart flush sensor (with a manual override button) is optimized for a 200,000-cycle battery life. Flushing uses one-eighth of a gallon of water—that's 85 percent less than a standard one-gallon-per-flush system. > Zurn Industries, LLC, Erie, PA, 814-455-0921; www.zurn.com CIRCLE 110

FSC-CERTIFIED CHILDREN'S FURNITURE

Community Playthings manufactures children's furniture and toys from FSC-certified maple from Northeastern states. They use UV-cured waterborne lacquer finishes on all the furnishings—tables, chairs, desks, shelves, cubbies, play structures, and entire roomscapes. Some products also use a low-emitting (CARB II) imported birch plywood that's also recently received FSC chain-of-custody certification. Many of the company's furnishings and accessories are certified to Indoor Advantage Gold. All come with a ten-year warranty. > Community Playthings, Rifton, NY, 800-777-4244; www.communityplaythings.com CIRCLE 111

BIMINI RESIDENTIAL GAS BOILERS

Condensing boilers capture the heat of vaporization from water in the combustion gases, boosting efficiency. Bimini gas-fired, fully modulating, sealed-combustion, condensing boilers have annual fuel utilization efficiency (AFUE) ratings up to 95.4 percent for residential-sized models. Modulated output

minimizes inefficiencies associated with on-off cycling. These quiet, low-NOx, low-mass, direct-vent boilers are approved for closet installation, and the smaller sizes can be wall-hung. Residential models are available in six sizes with inputs ranging from 70,000 to 225,000 Btus; larger commercial models

are also available, but with thermal efficiencies below GreenSpec standards. > Crown Boiler Company, Philadelphia, PA, 215-535-8900; www.crownboiler.com CIRCLE 112
