

The image shows a close-up of a solar shading fabric with a fine, woven mesh pattern. The fabric is shown in two colors: a light, off-white or cream color on the left, and a dark brown or charcoal color on the right. The fabric is curved, suggesting it is part of a roller shade. The lighting is soft, highlighting the texture of the mesh.

Clean

GlacierScreen™ solar shading fabrics meet the daylighting and light-filtering needs of any project. Available in 3%, 5%, and 1% Duotone, with GREENGUARD Children and SchoolsSM certification, VOC-free construction and microbial resistance. GlacierScreen FR fabrics – a cleaner take on roller shades.
